Dr. Barnes received his DDS from the University of Maryland Dental School in 1983, a certificate from the University of Maryland Dental School in Advanced General Dentistry in 1984 and a masters in oral biology in 1992 from the University of Maryland Graduate School. Dr. Barnes is a Professor, Division Head of General Dentistry and Director of the Advanced General Dentistry Program at the University of Maryland Dental School and on the associate staff at the University of Maryland Graduate School. He is a member of OKU, International College of Dentists, and Gamma Pi Delta Honor Societies. He is also a member of the ADEA, ADA, IADR, and AADR. Dr. Barnes is an active clinical dental materials researcher with over 1.5 million dollars of funding from many dental materials manufacturers. He has published many articles and presented numerous lectures on esthetic dentistry in the United States and internationally. He serves on the ADA's Commission on Dental Accreditation as a consultant and served as a review committee member. In addition to his teaching, service, and research responsibilities, he maintains an active private practice in Baltimore, Maryland.
