Presents:

**Dr. Wesley Haddix**

*Private Practice, Charlottesville, Virginia*

## ***Laser Applications in Dentistry: Beyond the Myth, Hype, and Marketing***

This presentation reflects Dr. Haddix's nearly six years of laser experience in daily dental application as well as the rationales for choosing a laser to incorporate into your practice based on your needs. Dr. Haddix will also cover the concerns of cost, patient acceptance, and the impact on the image of your practice. Clinical cases will be presented via photographs and video to best illustrate to the audience a realistic representation of laser dentistry at its best.

Dr. Wesley Haddix practices in Charlottesville, Virginia. He is a 1986 graduate of West Virginia University and completed a General Practice Residency at Charleston Area Medical Center in Charleston, West Virginia. He holds Fellowship in the International Congress of Oral Implantologists and the Misch Institute of Oral Implantology, and is a member of the International Academy of Laser Dentistry and Academy of Laser Dentistry. He emphasizes new technology that complements the delivery of high quality care including hard tissue lasers, CEREC, and the dental microscope. He has been an Erbium Laser user since October 2000, being one of the first in the United States to incorporate Hoya ConBio's DeLight (now VersaWave) laser into practice. He has been a diode laser user for two years, and last October incorporated the Millennium PerioLase as the third active therapeutic laser in his practice.
