Presents:

A.E. Pazoki, DDS, MD, FACS

*Oral and Maxillofacial Surgeon
Private Practice, Baltimore, MD*

Contemporary Management and Detecting Oral Cancer

This program would highlight the risk factors and new advances in detecting oral cancer as well as how to stage the disease and current treatment modalities as well as role of dental evaluation for patients undergoing cancer treatment.

This session also would cover some of the latest reconstruction procedures after the ablative procedures including microvascular reconstructive surgery.

Dr. Pazoki is an oral surgeon in private practice and Assistant Professor in the Department of Oral and Maxillofacial Surgery at the University of Maryland Medical System. He specializes in oral and maxillofacial surgery, maxillofacial oncology/pathology, microvascular reconstructive surgery, facial cosmetic and implant surgery and micro neurosurgery. He was the former Postdoctoral Residency Program Director at the Department of Oral and Maxillofacial Surgery, University of Maryland Dental School. Dr. Pazoki graduated from the New York University College of Dentistry and State University of New York at Stony Brook School of Medicine and subsequently completed residency in oral and maxillofacial surgery at the long island Jewish Medical Center and two fellowships in maxillofacial oncology and microvascular surgery at the university of Maryland. He has been the author of many book chapters and journal publications and has lectured extensively in this field.
